

Price list AlphaMax HI

For HERMETIA ILLUCENS chitosans

Chitosan from *Hermetia illucens* is a coarse, beige powder with relatively high molecular weight and higher deacetylation than crustacean-derived chitosan, making it more soluble and bioactive. Its uniform insect origin ensures consistent quality, enhanced antimicrobial properties, and better compatibility with biochemical processes due to its distinct molecular structure and more amorphous form.

The prices below are quoted ex-works in Euro per kg and vary according to the deacetylation degree, molecular weight and volume.

The prices below are offered for an order below 200kg.

	Deacetylation Degree		
Molecular Weight	>85%	>90%	>95%
> 200 kda	79	87	93
<200 kda	95	104	110
<10 kda	112	121	140

The discount below apply for order above 200kg.

Discount on order	200 Kg	500 Kg	1 000 Kg
	10%	20%	25%

included on each invoice

Year end discount	1 000 Kg	2 000 Kg
	5%	10%

Paid out in January 2025 based on Alpha-chitin invoices

Terms and Conditions:

These prices are valid until Dec 31, 2024.

These prices and conditions will apply to all orders confirmed by Alpha-Chitin before December 31, 2024.

The payment terms are at product departure. Special payment terms can be discussed later
All prices are subject to change with a 30 days notice.

For orders and inquiries, please contact our sales team at orders@alpha-chitin.fr.
